Acreage & Farm Safety

Program Description:

This interactive and hands-on program teaches students how to recognize potential dangers and avoid injury in an acreage or farm environment.

During a classroom story lesson, children learn to assess and safely navigate a number of realistic, potentially dangerous, scenarios. In the Safety Centre Barn children practice safety skills at interactive stations including animal awareness, ATV tipping, grain silos, chemical safety and many more.

They finish up their lesson outdoors on the land with playful and memorable games to ingrain the safety lessons they learned during the day.

Please note that while protected, some of the equipment showcased in this program can be dangerous – rowdy or misbehaving children will not be permitted to interact with stations in the barn for the safety of the whole group.

Curriculum Connections: Social Studies

Kindergarten

- Time and Place: Places in a Community, Culture & Expression
- Systems: Needs & Wants, Leaders
- Citizenship: Collaboration.

Grade 1

- Time and Place: Significance and Landmarks, Diverse Communities
- Systems: Working Together, Contributing to Communities
- Citizenship: Sense of Belonging

Grade 2

- Time and Place: Land and Natural Resources, Heritage
- Systems: Community Needs and Wants, Government Support
- Citizenship: Decision Making and Democracy, Action

Grade 3

- Time and Place: Features of the Land, Western Identity, Diverse Communities
- Systems: Natural Resources, Land Preservation, Rural Governance
- Citizenship: Civic Action and Community Impacts

Grade 4

- Time and Place: Colonial Access to Farmland & Agricultural Products
- Citizenship: Rights, Freedoms, Responsibilities

Grade 5

- Time and Place: Contemporary Innovations in Agriculture, Geography & Infrastructure
- Systems: Agricultural Advancements
- Citizenship: Informed Citizens, Evolution of Technology, Changing Personal Behaviours

Program Length: 1.5 hours | Cost: \$200 per class | Only Available at Safety City | Requires a minimum Adult to Child Ratio of 1:4

Please contact us for pricing on individual or small group program requests!

Be a Tree Animal Safety

Program Description:

Students will learn how domestic animals express themselves in natural ways, how to recognize signs of joy, playfulness, warnings, and aggression.

By studying the most expressive of dogs, students will learn to read and recognize body language, visual traits, and the messages that different vocalizations convey.

Knowing how happy and healthy animals react to human presence allows students to gain confidence around animals, and gives them the skills to recognize un-happy, erratic, or dangerous behaviors. They will also learn potentially life-saving techniques in response to an aggressive animal, acting to protect themselves and others in a safe and controlled environment.

This program can be adapted to include other animal groups or wildlife in general – contact us for more information.

A trained dog may be requested for this program, unknown or personal animals are not permitted for liability concerns and safety.

Curriculum Connections: Science

Kindergarten

- Matter: Properties & Senses
- Energy: Movement of Animals
- Earth Systems: Environments
- Computer Science: Instruction

Grade 1

- Matter: Changing Properties
- Energy: Movement of Animals
- Earth Systems: Seasonal Changes, Animal Behaviours
- Living Systems: Animal Survival, Domestic Animals
- Computer Science: Instructions, Respect, Safety
- Scientific Methods: Investigation, Predictions, Observations, Curiosity

Grade 2

- Matter: Natural Materials
- Energy: Sounds
- Living Systems: Animal Needs and Behaviours, Human Impacts
- Computer Science: Repetition

- Scientific Methods:

Investigation and Repetition

Grade 3

- Living Systems: Food Chain, Sensory Stimuli, Interactions, Respect, Animal Behaviour
- Computer Science: Patterns
- Scientific Methods: Objectivity

Grade 4

- Living Systems: Response to Stimuli, Organism Behaviours
- Scientific Methods: Qualitative

Program Available by Request and Animal Guest Availability – Program Length Varies | Available at Safety City or Approved Alternate Site

Please contact us for pricing on individual or small group program requests!

Bike Safety & PedalPushers

Program Description:

Focusing on proper road safety procedures and safe equipment, this program builds on the basic skills of beginner and intermediate cyclists. Students will learn how to inspect and care for their bike and the most common problems with the hardware.

Once safe to ride the group will learn proper signalling and right-of-way, emergency stops, and how to adhere to traffic and pedestrian signals with your bike.

After completing their training they will work through a multi-stage testing course to demonstrate their safe riding habits – receiving a PedalPushers certification upon completion.

An added off-site adventure can be included with this program booking for an additional fee – *time permitting*.

All cyclists must provide their own bike and helmet.

Curriculum Connections: Physical Education & Wellness

Kindergarten

- Active Living: Physical Activity in Daily Life;
- Movement Skills Development: Bodily Awareness & Fair Play;
- Safety: Boundaries;
- Healthy Relationships: Communication, Collaboration, Empathy, & Respect.

Gr. 1

- Active Living: Healthy Physical Activity;
- Movement Skill Development: Awareness of Surroundings & Fair Play;
- Safety: Safe Boundaries.

Gr. 2

- Active Living: Meaningful Physical Activity;
- Movement Skill Development: Awareness and Movement, Teamwork;
- Character Development: Opportunities & Roles;
- Safety: Various Contexts;
- Healthy Relationships: Context.

Gr. 3+

- Active Living: Variety & Lifestyle;
- Movement Skills: Tactics, Teamwork, Competence, Positive Interactions;
- Character Development: Opportunities & Roles;
- Safety: Connection to Health;
- Healthy Relationships: Problem Solving;
- Growth & Development: External Factor

Program Length: Varies | Cost: \$200 per class or \$15 per child | Available at any Applicable Location – Travel Fees may apply

Please contact us for pricing on individual or small group program requests!

Cycle Safety Roadeo

Program Description:

Cycling and wheeled sports are a great way for young people to get around, keep active, and have fun!

A cycle safety day acts as motivation for youth to strive to improve their skills and awareness. While the goal of the program is education, not competition (although rest assured there will be some), a Cycle Safety Roadeo provides hands-on experiential learning which increases skill and information retention while being a fun alternative learning day.

Cyclist evaluations provide the opportunity to build on skills and track youth improvements as riders grow and develop.

All cyclists must provide their own bicycle (training wheels acceptable), helmet, and optional pads.

Requires 8-10 volunteers in addition to class teachers provided by the registering school/group.

Fire & Home Safety

Program Description:

Do your children know the importance of a home escape plan or how to call 9-1-1? This program combines a classroom safety story with hands-on activities and a visit to Sparky's House. Students learn how fires start, how to spot and control common hazards in your home, how to create a home escape plan, and practice calling 9-1-1.

In Sparky's House the children take the role of inspector, writing up our usually diligent staff for the things they have left lying around before performing a daring escape through less-than-normal means of exiting your average family home in a sudden emergency scenario.

Please note that this program does involve a non-toxic smoke machine, children with severe asthma will be accommodated but our team must be made aware prior to the program.

Traffic & Pedestrian Safety

Program Description:

During our premiere field-trip program, students learn the basics of street safety using an interactive storyboard depicting a classical neighbourhood. Children learn to safely cross the street using the 7 *Steps-to-Safety*, the meaning of various road signs, and how to read a set of traffic lights.

Working outdoors in our CityStreetScape, students practice their newfound safety skills as both pedestrian and vehicle operators using our battery powered mini-quads, bikes, or adapted buggies.

All participants must bring their own fitted bicycle helmets.

Mini-quads are weight rated to 100lbs.

Class sizes are restricted to a maximum of 25 riders.

If opting to use bicycles participants must bring their own bikes, scooters, skateboards, or roller skates.

Birthday Parties

Wheels & Wonders – Spring | Summer | Fall

In this Safety City birthday party, children will learn road and vehicle safety before heading out to roam around the CityScape on our fleet of battery-powered mini-quads! Visit the local organizations within and discover fun challenges while staying on the right-side of the Law!

Party program has a significant outdoor component, guests must dress for the weather.

All kids go home with a safety goodie bag and the birthday child receives an upgraded version in their very own backpack!

Parties are limited to 15 kids.

All riders must bring their own helmets.

Fridge and microwave available by request.

Winter – Fire & Ice

In this Safety City birthday party, children learn the ins and outs of FIRE! From using fire to stay safe and warm to starting campfires and roasting marshmallows, our guests must first traverse the slippery terrain of the CityScape and learn to stay safe in the winter and walk on ice!

Party program has a significant outdoor component, guests must dress for the weather.

All kids go home with a safety goodie bag and the birthday child receives an upgraded version in their very own backpack!

Parties are limited to 15 kids.

Guests to provide special marshmallows for dietary needs.

Fridge & microwave available by request.

Available for ages 4 – 12 | Available Evenings & Weekends or by Special Request

Price \$185 | Visit SafetyCity.ca for add-on options and more information!

Please contact us for pricing on individual or small group program requests!

Summer & Day Camps

Professional Development Day Camps:

Do you find your child in need of something fun to do on days without school? In these single day camps children will spend the day learning seasonally appropriate safety skills and have the opportunity to explore, craft, snack, and play at Safety City!

Day Camp Programming

Themes will vary with the season. Please note that not every camp will have the ability to drive around the CityScape due to weather conditions and seasonality.

Camps must have 4 youth registered to run!

Camp requirements (helmets, bikes, special dress, etc.) will be communicated to parents the week prior to camp.

Summer Camps:

In our week-long full-day summer camps children will explore a wide variety of safety topics, learn valuable lessons, fill their days with crafts and games, and meet some very special special guests! This week of exciting experiences ensures all kids learn how to avoid injuries no matter what situations life may throw at them.

Programs included in Summer Camp:

Helmet required – Traffic & Pedestrian Safety
Acreage & Farm Safety
Fire & Home Safety
Animal & Pet Safety
Helmet required – PedalPushers & Bike Safety

Available for ages 4 – 12 | Program Availability Changes Seasonally

Program Cost: \$200 per week or \$45 per day

Camp regular hours run from 9 a.m. – 3 p.m. | Visit SafetyCity.ca for pricing, add-on options, and to register!

Please contact us for pricing on individual or small group program requests!
